The specification appears to be incomplete. There are no details under Background of the Invention on page 1 of the specification.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 9-11 and 17, drawn to a device for blocking junk email, classified in class 709, subclass 203.
- II. Claims 4-8, 12-16 and 18, drawn to a device for receiving emails, classified in class 709, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a device which process emails. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to James D, Halsey on March 12, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
